

Authentication Feature Documentation

Overview

This document summarizes the authentication forms in the Inventory app based on the current UI.

Login Form

- **Page title:** Welcome Back
- **Description:** Log in to access the inventory system.
- **Fields:**
 - Username
 - Password
- **Button:** Login
- **Footer:** "Don't have an account? Register here"
- **Behavior:**
 - Uses username/password authentication
 - Redirects to `/home` after successful login
 - Provides a link to the registration page

Register Form

- **Page title:** Register New User
- **Description:** Create your account to access the inventory system.
- **Fields:**
 - Name
 - Username
 - Email
 - Password
- **Button:** Register
- **Footer:** "Already have an account? Login here"
- **Behavior:**
 - Creates a new account with name, username, email, and password
 - Sends registration data to the backend API
 - Redirects to login page after successful registration

Notes

- The login flow is intentionally simple: username and password only.
- The registration flow collects standard user profile information.
- The UI is designed to be clean, modern, and user-friendly.

Screenshots

Below are the saved frontend screenshot files.
